HEAD SPA

FROM DESIGN TO TECHNOLOGY:
A JOURNEY INTO THE SALON OF THE FUTURE

**Maletti**

10
products

16
protocols

Technology and innovation: for a salon focused on the client experience

DEDICATED ATTENTION TO THE HEAD SPA: A CONCEPT THAT IS REVOLUTIONIZING THE HAIRDRESSING INDUSTRY. INTEGRATING AN AREA DEDICATED TO HAIR AND SCALP WELLNESS NOT ONLY ENRICHES THE SALON'S SERVICE OFFERING, BUT ALSO CREATES A LUXURIOUS AND RELAXING ENVIRONMENT THAT FOSTERS CLIENT LOYALTY AND INCREASES THE PERCEIVED VALUE OF THE SERVICE.

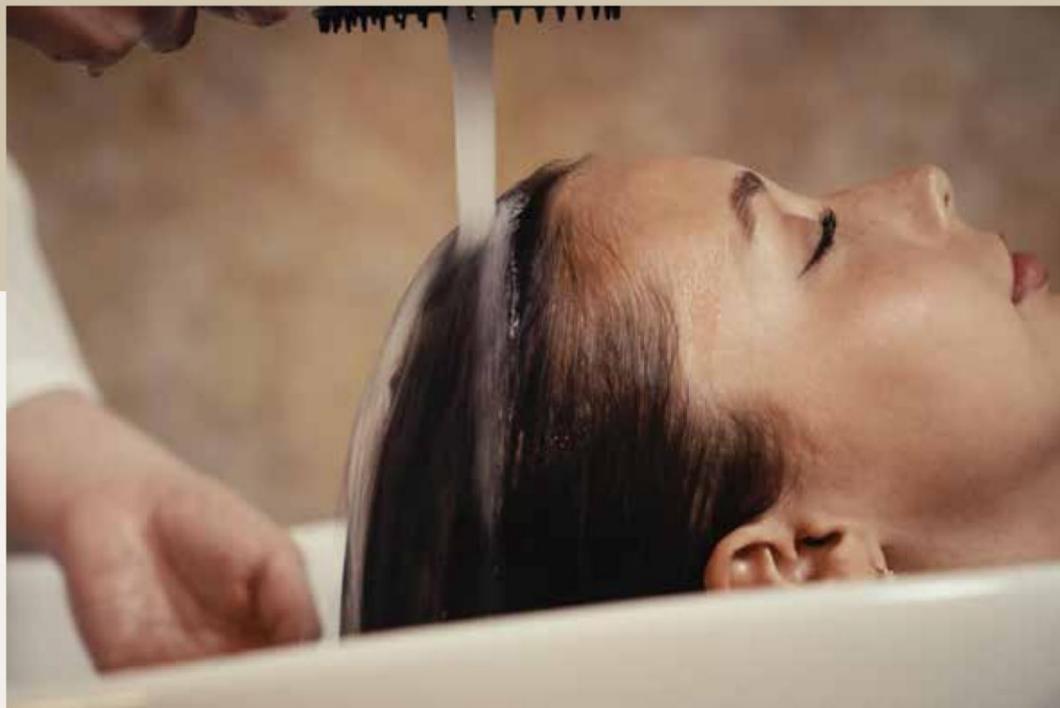

An innovative approach to space design

AT THE HEART OF MALETTI'S PROPOSAL IS A STRATEGIC CONSULTING SERVICE THAT STARTS FROM SALON DESIGN WITH A PERSONALIZED APPROACH. IT'S NOT JUST ABOUT CHOOSING DESIGN FURNITURE, BUT ABOUT DEVELOPING A TAILOR-MADE PROJECT BASED ON THE HAIRDRESSER'S NEEDS AND BUSINESS MODEL. THE GOAL IS TO OPTIMIZE SPACES, CREATE A MOODBOARD CONSISTENT WITH THE SALON'S IDENTITY, AND ENSURE AN EFFICIENT WORKFLOW.

Heaven + Showerhead

WITH MALETTI, THE SALON IS NOT JUST A WORKPLACE,
BUT AN EXCLUSIVE ENVIRONMENT WHERE DESIGN,
TECHNOLOGY, AND STRATEGY COME TOGETHER TO BRING TO
LIFE AN EXPERIENCE OF BEAUTY AND WELL-BEING WITHOUT
COMPROMISE.

HEAVEN

DREAM FLOW

SHIRODARA

SHIROBODY

ALOE SOFT

VAPOMIST 1 NEW

SHOWERHEAD

HEAVEN

Maletti designed the heaven wash unit with a strong focus on comfort for both the operator and the client. For the client, a single-bar frame and a double-jointed footrest have been introduced to make access easier and ensure a comfortable position. Various internal mechanisms correctly position the client for treatment, while the basin's adjustable height allows the operator to work comfortably, whether seated or standing. Finally, the patented adjustable headrest and the fully reclining seat, developed in collaboration with medical specialists, ensure complete muscle relaxation and perfect spinal alignment, guaranteeing proper posture.

Heaven is available in a standard version or with an air-massage system.

ACCESSORIES: IGLOO SHIRODHARA - VAPOMIST 1 NEW + IGLOO STEAM - SHOWERHEAD

Igloo SHIRODARA

This innovative device has been designed to offer a unique experience in the Shirodhara treatment, thanks to a curved dispenser that releases a constant flow of warm water onto the client's forehead.

The arch of the device is adjustable, allowing it to be positioned precisely to ensure maximum comfort during the treatment. The water cascade is integrated into a dedicated Igloo which, when combined with the Vapomist system, provides the client with a steam bath enriched with aromatic oils.

COMPATIBLE WITH: HEAVEN - EDEN - ALU WASH - LORD NELSON - GREEN STAR CLASS

ALOE SOFT

Aloe Soft is an innovative stool designed to provide the operator with maximum comfort during treatments.

A unique feature of Aloe Soft is the way it must be used: the stool is positioned turned relative to a traditional seat, allowing the operator to work in a seated position without placing body weight on the client's head. This configuration ensures an ergonomically correct posture, ideal for performing massages or shampoo treatments, relieving the lumbar area from tension and overload.

SHIROBODY

The Shirobody bed is designed for hairdressers and beauticians. It guarantees maximum comfort and functionality, meeting the needs of every client.

Washing and hair treatment: ideal to accompany the Shirodhara treatment, it offers a feeling of complete relaxation and regeneration. The water cascade purifies and revitalizes the scalp, promoting healthier and shinier hair. Ayurvedic treatments: this bed, equipped with a double oil drain, is perfect for full wellness rituals, creating an atmosphere of tranquility and total relaxation.

Facial treatments: the reclining backrest ensures maximum precision and comfort during beauty treatments, delivering flawless results. Available in different versions: standard, with slat massage, with thermal system, or a combination of both.

ACCESSORIES: DREAM FLOW - SHIRODHARA - VAPOMIST 1 NEW + IGLOO STEAM - SHOWERHEAD

DREAM FLOW - SHIRODARA

Dream Flow is an elegantly designed arch equipped with small openings along its structure, through which water gently flows, evenly enveloping the head and providing a deep sense of relaxation and comfort. In addition to cleansing the hair, the water jets are designed to massage the scalp and stimulate the epidermis, promoting deep relaxation and contributing to the client's mental and physical well-being. This gentle flow not only cleanses the hair but also induces profound relaxation.

Dream Flow is part of the Head Spa treatment — a holistic experience that combines hair washing with massage techniques, aromatherapy, and scalp stimulation.

This water cascade is also available in a version with a single water stream: the Shirodhara arch, a curved dispenser that releases a constant flow of warm water onto the forehead, stimulating the Third Eye, one of the Chakras according to the principles of Shirodhara.

COMPATIBLE: SHIROBODY

GREEN STAR CLASS

ALU WASH

EDEN

LORD NELSON

Igloo SHIRODARA

SHOWERHEAD

VAPOMIST 1 NEW

ALU WASH | GREEN STARCLASS | LORD NELSON

Alu Wash, Green Star Class, and Lord Nelson are wash units manufactured by Maletti Group and produced entirely in Italy. They offer the possibility of washing hair using both the European system (client seated) and the Japanese Shiatsu system (client lying down). This flexibility perfectly adapts to different hair treatment techniques, providing a versatile solution for beauty salons.

It is now possible to meet clients' needs more completely, ensuring comfort and practicality during hair washing. These wash units are also available with an integrated air massage system in the seat, which can be combined with the steam or Shirodhara system.

The ceramic basin is generously sized in both width and depth, meeting ergonomic work standards for professionals and ensuring the ideal distance between the operator and the client's head.

EDEN

The Eden wash unit represents the perfect combination of technology and design in the service of well-being. A product of refined style yet highly functional, it features a reclining chair with massage, a dome with sensory lighting, and the option to incorporate aromatherapy.

Eden is also equipped with Maletti's integrated steam system the ultimate frontier of wellness designed to enhance salon treatments with the benefits of steam: a true SPA experience for the hair and scalp.

ACCESSORIES: IGLOO SHIRODHARA - VAPOMIST 1 NEW + IGLOO STEAM - SHOWERHEAD

SHOWERHEAD

Professional wash unit shower with ACF (Activated Carbon Fiber) filter and massage function. Showerhead transforms hair washing into a spa experience: an innovative shower designed for professional wash units. It combines advanced filtration with a stimulating scalp massage, offering clients a high-quality service. This showerhead is engineered to effectively remove impurities, microplastics, and residues present in water, ensuring a purer and gentler scalp cleansing.

Thanks to the WaterGrip silicone nozzle, it provides a stable, non-slip grip. The water pressure is directed to penetrate deeply into the scalp, removing impurities and stimulating circulation to promote hair growth.

COMPATIBLE WITH: HEAVEN - EDEN - ALU WASH - LORD NELSON - GREEN STAR CLASS - SHIROBODY

VAPOMIST 1 NEW + IGLOO VAPORE

Vapomist 1 New allows treatments with hot steam by positioning the Igloo dome over the wash unit, ensuring optimal steam retention. The Vapomist uses demineralized water poured directly into its tank, with no need for a plumbing connection.

Hot steam treatments enable deeper penetration of active ingredients into the hair and scalp. The Vapomist 1 New system can be applied to all Maletti Group wash units without replacing the showerhead.

COMPATIBLE WITH: HEAVEN - EDEN - ALU WASH - LORD NELSON - GREEN STAR CLASS - SHIROBODY

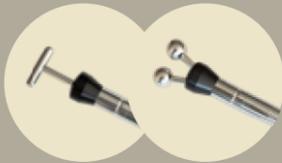

SPA GARÇON

AQUA PEEL

HEATING MASSAGE

GALVANIC Y/T

BIONIC BRUSH

MICRO BUBBLE SHAMPOO

HYDRO SPRAY

We are pleased to introduce the new Spa Garçon. This device combines advanced technologies to deliver tangible and long-lasting results, meeting the needs of those who seek excellence in hair and scalp health and well-being.

Specifically, the device integrates several technologies, such as:

- Deep Scalp Cleansing - Aqua Peel
- Galvanic Current - Galvanic Y/T
- Photobiostimulation + Galvanic Current - Bionic Brush
- Thermal Massage - Heating Massage
- Micro-nebulization of specific products - Hydro Spray.

The use of these technologies, combined with targeted treatments, provides the following results:

- Purifies and strengthens, improving the overall health of the hair and scalp.
- Stimulates microcirculation and promotes better cellular oxygenation.
- Facilitates natural skin regeneration and balance.
- Enhances skin permeability, improving the absorption of active treatment ingredients.

Thanks to the development of multiple treatment protocols, created through Maletti's expertise and in collaboration with professional hairdressers, each session becomes a true ritual of renewal and well-being.

ESSENCE treatment

1 hour and 30 min

The Essence treatment is designed for those who want to nourish, hydrate, and purify the hair, focusing especially on the full length of the strands. This treatment is ideal for damaged or dehydrated hair, as it restores vitality and softness while respecting the hair's natural structure. Thanks to the steam and the Shirodara cascade, the Essence treatment provides an immediate sensation of well-being, leaving the hair visibly healthier, lighter, and more radiant. Begin the Essence ritual with an in-depth scalp assessment and a personalized consultation. Using the trichocamera, analyze the scalp and hair to create a tailor-made treatment.

15 min.

Begin the Essence ritual with an in-depth scalp assessment and a personalized consultation. Using the trichocamera, analyze the scalp and hair to create a tailor-made treatment.

10 min.

Perform a shampoo to remove impurities and stimulate microcirculation. Gently massage the scalp and distribute the shampoo along the hair for a thorough cleanse.

5 min.

Rinse and repeat a second shampoo. Apply the most suitable mask to mid-lengths and ends, previously chosen during the diagnosis, and leave the treatment to act for the necessary time.

10 min.

To enhance every treatment, use the Vapomist. The mist of steam enriched with essential oils promotes scalp purification and deep penetration into the hair, improving the treatment's effectiveness and providing a pleasant sensation of relaxation, care, and well-being.

5 min.

Rinse the mask thoroughly while gently massaging the scalp and hair.

5 min.

Activate the Shirodhara cascade. The flowing water massages the third eye, stimulates energy flow, improves circulation, and reduces stress. This rinsing process regenerates the scalp and hair, purifying and balancing mind and body for complete well-being.

40 min.

To conclude this exclusive ritual, Essence performs the client's desired blow-dry and styling service.

PREMIUM treatment

1 hour and 40 min

The Premium treatment is a complete ritual that cares for the hair from the scalp to the ends. It begins with a gentle scalp exfoliation that deeply purifies, stimulates microcirculation, and prepares the skin to receive active ingredients. Nutrient-rich masks are then applied along the hair to restore hydration, strength, and softness. It is the ideal treatment for those seeking a moment of relaxation and regeneration, thanks to the properties of water and steam, while respecting the natural balance of the hair and scalp.

15 min.

Begin the Premium ritual with an in-depth scalp assessment and a personalized consultation. Using the trichocamera, analyze the scalp and hair to create a tailor-made treatment.

5 min.

Start the relaxation phase by applying an exfoliating or peeling treatment enriched with essential oils with soothing and anti-inflammatory properties to the scalp, stimulating microcirculation and providing a deep cleanse.

10 min.

To enhance each treatment, use the Vapomist. The mist of steam infused with essential oils promotes scalp purification and deep penetration into the hair, improving the effectiveness of the treatment and offering a pleasant sensation of relaxation, care, and well-being.

5 min.

Carefully rinse off the peeling previously applied to the scalp.

10 min.

Perform the shampoo to remove impurities and stimulate microcirculation. Gently massage the scalp and distribute the shampoo from roots to ends for a thorough cleanse.

10 min.

Rinse the first shampoo and repeat the application. Apply the most suitable mask to mid-lengths and ends, previously chosen during the diagnosis. Leave the treatment on for the necessary time while massaging the scalp and hair to facilitate product absorption.

5 min.

Rinse the mask thoroughly while gently massaging the scalp and hair.

10 min.

Activate the Shirodhara cascade. The flowing water massages the third eye, stimulates energy flow, improves circulation, and reduces stress. This rinse regenerates the scalp and hair, purifying and balancing mind and body for total well-being.

40 min.

To conclude this exclusive Premium ritual, perform the client's desired blow-dry and styling service.

SUPREME treatment

2 hours

The Supreme treatment is the most complete and profound ritual. It is recommended for those who wish to experience total relaxation while achieving a deep cleanse and intensive nourishment throughout the hair. The protocol includes several phases: thorough scalp cleansing, specific treatments for the hair lengths, and relaxing massages. Supreme is the ideal choice for those seeking deep hair regeneration, restoring strength, shine, and beauty, with maximum attention to scalp well-being and the health of the hair fibers.

15 min.

Begin the Supreme ritual with an in-depth scalp assessment and a personalized consultation. Using the trichocamera, analyze the scalp and hair to create a tailor-made treatment.

5 min.

Start the relaxation phase by applying an exfoliating or peeling treatment enriched with essential oils with soothing and anti-inflammatory properties to the scalp, stimulating microcirculation and providing a deep cleanse.

10 min.

Perform a relaxing massage to promote the absorption of the applied product, removing impurities and excess sebum while stimulating microcirculation.

10 min.

To enhance every treatment, use the Vapomist. The mist of steam enriched with essential oils promotes scalp purification and deeper product penetration into the hair, improving the effectiveness of the treatment and providing a pleasant sensation of relaxation, care, and well-being.

5 min.

Rinse thoroughly and carefully the peeling previously applied to the scalp.

10 min.

Perform the shampoo to remove impurities and stimulate microcirculation. Gently massage the scalp and distribute the shampoo from roots to ends for a deep cleanse. Rinse the first shampoo and repeat the application.

10 min.

Apply the most suitable mask to mid-lengths and ends, previously selected during the diagnosis. Leave the treatment on for the required time while massaging the scalp and hair to improve product absorption.

5 min.

Rinse the mask thoroughly while gently massaging the scalp and hair.

10 min.

Activate the Shirodhara cascade. The flowing water massages the third eye, stimulates energy flow, improves circulation, and reduces stress. This rinse regenerates the scalp and hair, purifying and balancing mind and body for total well-being.

40 min.

To conclude this exclusive Supreme ritual, provide the client's desired blow-dry and styling service.

DETOX treatment

1 hour and 20 min / 1 hour and 35 min

SUITABLE ALSO FOR TRAINEEST

HEATING MASSAGE

AQUA PEEL

VAPORE

MICRO BUBBLE SHAMPOO

SHIRODARA CASCADE

Welcome and consultation at the workstation 5 min

Brief conversation with the client: ask about their needs, possible sensitivities, and desired hairstyle. Quickly perform a visual and tactile assessment of the scalp and hair fiber.

Application of scalp peeling 5 min

Apply the exfoliating or restorative product, distributing it with the hands or a brush. Perform a relaxing scalp massage and ensure proper product absorption.

Use of Heating Massage 5 min

Prepare the handpiece at the desired temperature (always check the temperature and the client's sensitivity). Perform slow, circular movements on the neck, shoulders, temples, and hairline above the ears, avoiding excessive pressure.

Focus on the neck and shoulders to release muscle tension and help the client fully relax.

Deep Scalp Cleansing 12 min

Set the Aqua Peel handpiece according to the device instructions (suction intensity / solution flow). Perform systematic passes over the entire treatment area for deep scalp cleansing.

Application of soothing product 3 min

Apply the soothing product to the scalp and gently massage to distribute it evenly.

Client at the shampoo station + steam application 10 min

Have the client sit comfortably at the shampoo station, adjusting the position and neck cushion properly. Apply steam for 10 minutes to enhance the action of the soothing product or mask and to soften the hair fiber.

Micro Bubble Shampoo + specific mask 10 min

Rinse thoroughly and apply the shampoo previously prepared in the dispenser. Allow the active foam to work on the scalp. Emulsify and rinse. Repeat twice and rinse again. Apply the specific mask, distributing it evenly; comb if necessary and rinse thoroughly at the end. Optionally, use the Shirodhara cascade to promote client relaxation and well-being.

Return to workstation + blow-dry service 30-45 min

Apply the most suitable styling product according to the desired result, then proceed with drying and styling.

Indicative time: about 30 minutes (short hairstyle), up to 45 minutes (complex hairstyle or very long hair).

REPAIR treatment

1 hour and 40 min / 1 hour and 55 min

SUITABLE FOR SPECIALIZED OPERATORS

HEATING MASSAGE

AQUA PEEL

STEAM

MICRO BUBBLE SHAMPOO

SHIRODARA CASCADE

HYDRO SPRAY

BIONIC BRUSH

Welcome and consultation at the workstation 10 min

Brief conversation with the client: ask about their needs, possible sensitivities, and desired hairstyle. Perform a quick visual and tactile assessment of the scalp and hair fiber.

Application of scalp peeling 5 min

Apply the exfoliating or restorative product, distributing it with the hands or a brush. Perform a relaxing scalp massage and ensure proper product absorption.

Use of Heating Massage 5 min

Prepare the handpiece at the desired temperature (always check the temperature and the client's sensitivity). Perform slow, circular movements on the neck, shoulders, temples, and hairline above the ears, avoiding excessive pressure. Focus on the neck and shoulders to relax the muscles and enhance the client's sense of well-being.

Deep Scalp Cleansing 12 min

Set the Aqua Peel handpiece according to the device instructions (suction intensity and solution flow). Perform systematic movements across the entire treatment area for a deep scalp cleansing.

Application of soothing product 3 min

Apply the soothing product to the scalp and gently massage to distribute it evenly.

Client at the shampoo station + steam application 10 min

Have the client sit comfortably at the shampoo station, adjusting the position and headrest correctly. Apply steam for 10 minutes to enhance the action of the soothing product or mask and to soften the hair fiber.

Micro Bubble Shampoo + specific mask 10 min

Rinse thoroughly and apply the specific shampoo previously prepared in the dispenser (one part shampoo to four parts water). Perform a double wash with active foam, which activates the surfactants in advance, making the shampoo gentler and more effective without irritating the scalp. Rinse. Apply the specific mask, distributing it evenly and combing if necessary. After the exposure time, rinse thoroughly.

Shirodara Cascade 5 min

Activate the Shirodhara cascade. It promotes scalp relaxation, deep release, and stimulation of microcirculation.

Hydro Spray Application 5 min

Select the specific ampoule according to the scalp's needs (stimulating, soothing, balancing, etc.). Spray it using the Hydro Spray handpiece integrated into the device for more effective absorption.

Use of Bionic Brush 5 min

Set the galvanic current handpiece and select the appropriate LED light:

- Red: stimulating and revitalizing,
- Blue: purifying and soothing,
- Violet: balancing and regenerating.

Perform the movements for 5 minutes.

Return to workstation + styling service 30-45 min

Apply the most suitable styling product according to the desired result, then proceed with drying and styling. Estimated time: about 30 minutes for short hair, up to 45 minutes for complex styling or very long hair.

SHINE treatment

1 hour and 45 min / 2 hours

SUITABLE FOR SALON OWNERS AND SPECIALIZED OPERATORS

HEATING MASSAGE

AQUA PEEL

STEAM

MICRO BUBBLE SHAMPOO

SHIRODARA CASCADE

HYDRO SPRAY

BIONIC BRUSH

Welcome and consultation with trichocamera 10 min

Brief conversation with the client: ask about their needs, possible sensitivities, and desired hairstyle. Perform a detailed analysis of the scalp and hair fiber using the trichocamera for precise observation.

Application of scalp peeling 5 min

Apply the exfoliating or restorative product, distributing it with the hands or a brush. Perform a relaxing scalp massage and ensure proper absorption of the product.

Use of Heating Massage 5 min

Prepare the handpiece at the desired temperature (always check the temperature and the client's sensitivity). Perform slow, circular movements on the neck, shoulders, temples, and hairline above the ears, avoiding excessive pressure. Focus on the neck and shoulders to relax the muscles and enhance the client's sense of well-being.

Deep Scalp Cleansing 12 min

Set the Aqua Peel handpiece according to the device instructions (suction intensity and solution flow). Perform systematic movements over the entire treatment area to achieve deep scalp cleansing.

Application of soothing product 3 min

Apply the soothing product to the scalp according to the technical guidelines. Gently massage to distribute it evenly.

Galvanic Current Y/T 5 min

Set the Galvanic Y/T device according to the manual. The increase in local blood flow and lymphatic drainage allows for better penetration of the active ingredients of the selected product. Perform systematic and controlled movements to stimulate microcirculation and prepare the scalp for the next phase.

Client at the shampoo station + steam application 10 min

Have the client sit comfortably at the shampoo station, adjusting the position and headrest correctly. Apply steam for 10 minutes to enhance product action and soften the hair fiber.

Micro Bubble Shampoo + specific mask 10 min

Rinse thoroughly and apply the specific shampoo previously prepared in the dispenser (one part shampoo to four parts water). Perform a double wash with active foam, which activates the surfactants in advance, making the shampoo gentler and more effective without irritating the scalp. Rinse. Apply the specific mask, distributing it evenly and combing if necessary. After the exposure time, rinse thoroughly.

Shirodara Cascade 5 min

Activate the Shirodhara cascade. It promotes scalp relaxation, deep release, and stimulation of microcirculation.

Hydro Spray Application 5 min

Select the specific ampoule according to the scalp's needs (stimulating, soothing, balancing, etc.). Spray using the Hydro Spray handpiece integrated into the device for more effective absorption.

Use of Bionic Brush 5 min

Set the galvanic current handpiece and select the appropriate LED light:

- Red: stimulating and revitalizing,
- Blue: purifying and soothing,
- Violet: balancing and regenerating.

Perform the movements for 5 minutes.

Return to workstation + styling service 30-45 min

Apply the most suitable styling product according to the desired result, then proceed with drying and styling. Estimated time: about 30 minutes for short hair, up to 45 minutes for complex styling or very long hair.

HARMONY EXPERIENCE treatment

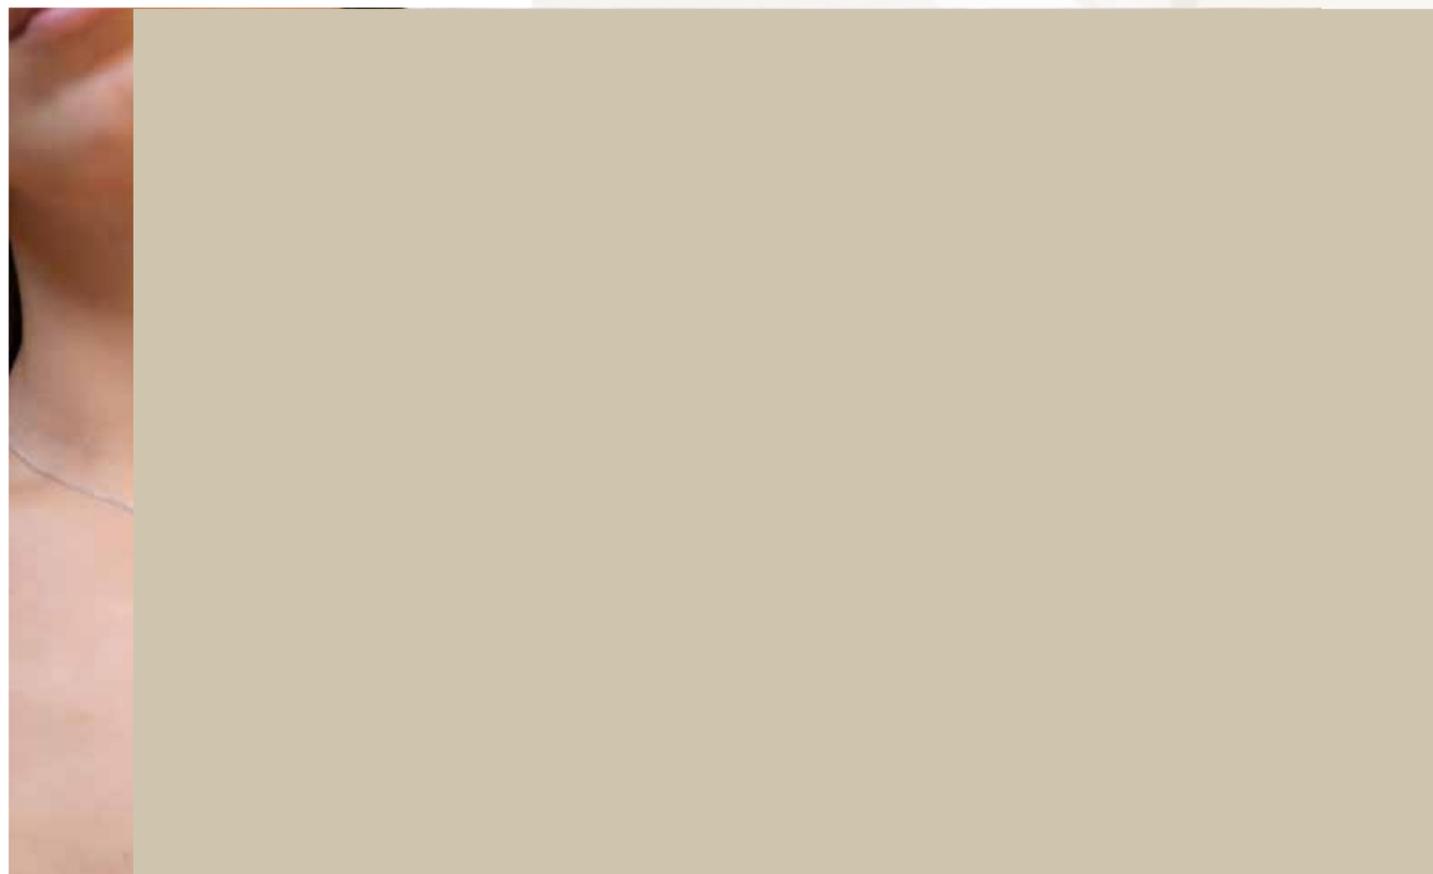

1 hour and 10 min / 1 hour and 25 min

SUITABLE ALSO FOR TRAINEES

HEATING MASSAGE

AQUA PEEL

MICRO BUBBLE SHAMPOO

Welcome and consultation at the workstation 5 min

Brief conversation with the client: ask about their needs, possible sensitivities, and desired hairstyle. Perform a quick visual and tactile assessment of the scalp and hair fiber.

Application of scalp peeling 5 min

Apply a restorative product or treatment, distributing it with the hands or a brush. Perform a relaxing scalp massage and ensure proper product absorption.

Use of Heating Massage 5 min

Prepare the handpiece at the desired temperature (always check the temperature and the client's sensitivity). Perform slow, circular movements on the neck, shoulders, temples, and hairline above the ears, avoiding excessive pressure. Focus particularly on the neck and shoulders to relax the muscles and enhance the client's overall sense of well-being.

Deep Scalp Cleansing 15 min

Set the Aqua Peel handpiece according to the device instructions (suction intensity and solution flow). Perform systematic movements across the entire treatment area.

Micro Bubble Shampoo + specific mask 10 min

Rinse thoroughly, apply the specific shampoo, and repeat twice. Rinse again. Apply the corresponding mask, distributing it evenly; comb if necessary and rinse thoroughly at the end.

Return to workstation + styling service 30-45 min

Apply the most suitable styling product according to the desired result, then proceed with drying and styling. Estimated time: about 30 minutes for short hair, up to 45 minutes for complex styling or very long hair.

SCALP REBIRTH treatment

1 hour and 25 min / 1 hour and 40 min

SUITABLE FOR SALON OWNERS AND SPECIALIZED OPERATORS

HEATING MASSAGE

AQUA PEEL

GALVANIC Y/T

MICRO BUBBLE SHAMPOO

HYDRO SPRAY

BIONIC BRUSH

Welcome and consultation at the workstation 10 min

Brief conversation with the client: ask about their needs, possible sensitivities, and desired hairstyle. Perform a quick visual and tactile assessment of the scalp and hair fiber.

Application of scalp peeling 5 min

Apply a restorative product or treatment, distributing it with the hands or a brush. Perform a relaxing scalp massage and ensure proper product absorption.

Use of Heating Massage 5 min

Prepare the handpiece at the desired temperature (always check the temperature and the client's sensitivity). Perform slow, circular movements on the neck, shoulders, temples, and hairline above the ears to promote relaxation and relieve muscle tension.

Deep Scalp Cleansing 15 min

Set the Aqua Peel handpiece according to the device instructions (suction intensity and solution flow). Perform systematic movements over the entire treatment area.

Micro Bubble Shampoo 5 min

Prepare the emulsion in the dispenser by mixing one part of the specific shampoo with four parts of water. The foam activates the surfactants beforehand, making the product gentler and more effective on the scalp without irritation. Activate the handpiece and apply the shampoo directly at the workstation (the dense emulsion allows optimal distribution even at the chair). Have the client recline at the shampoo station and rinse. Apply a second dose of shampoo and, without rinsing, proceed with the Galvanic Y/T handpiece.

Galvanic Current Y/T 5 min

Set the Galvanic Y/T handpiece according to the technical instructions. It helps improve follicular circulation, treats seborrheic scalp conditions, provides a keratolytic effect, and enhances shampoo cleansing. Perform systematic and controlled movements to stimulate microcirculation and prepare the scalp for the next phase.

Mask application

Apply the specific mask, distributing it evenly. Comb if necessary and rinse thoroughly at the end.

Hydro Spray Application 5 min

Select the specific ampoule according to the scalp's needs (stimulating, soothing, balancing, etc.). Apply it using the Hydro Spray handpiece integrated into the device for more effective absorption.

Use of Bionic Brush 5 min

Set the galvanic current handpiece and select the appropriate LED light:
 Red: stimulating and revitalizing,
 Blue: purifying and soothing,
 Violet: balancing and regenerating.
 Perform the movements for 5 minutes.

Return to workstation + styling service 30-45 min

Apply the most suitable styling product according to the desired result, then proceed with drying and styling. Estimated time: about 30 minutes for short hair, up to 45 minutes for complex styling or very long hair.
